## **Registration Interview**

The registration interview is carried out by an occupational psychologist to map out the complaint profile and formulate a proposal for a support programme.

Through a conversation and psychological questionnaire, the occupational psychologist will get a good picture of your support requirements. With your consent, the psychologist will contact your manager and/or company doctor (if applicable). The occupational psychologist will formulate a proposal for a support programme.

#### This is Registration Interview

- step 1 a preparatory phone conversation between the occupational psychologist and the referrer(s) (with your consent)
- step 2 live conversation between you and the occupational psychologist
- step 3 psychological screening on BG- GGZ/GG-GGZ criteria
- step 4 you will receive a report of the current situation
- step 5 Shared Ambition will propose a support programme to the referrer
- step 6 the referrer will receive a substantiated reason for the choice of intervention

#### This is what you will achieve

You will have had a registration interview with the psychologist and completed a psychological screening. With the help of the information from the registration interview and the screening a report is made. The report will give you insight into the causes of your complaints and you will know which programme you are going to do.
